

DESCRIPTION: Acetak is an insecticide for control of white flies in roses. ACETAK is an acetamiprid product, with knock down and systemic control of white flies. It has a translaminar effect hence effectively control of white flies.

APPLICATION METHOD: Fill the spray tank with half of the desired quantity of water. Add the recommended amount of ACETAK 200SL and complete to fill unit desired quantity of water while stirring constantly. ACETAK 200SL should be applied as a full cover spray. Ensure an even and thorough coverage of all plant parts including the underside of the plant leaves. ACETAK 200SL should be sprayed at the onset of white flies and three applications are recommended each at intervals of 7 days.

APPLICATION:

Crop	Pest	Rate
Roses	White flies	10ml/20litres of water 500ml perha / 1000L

HAZARDS PRECAUTIONS: Handling: Wear protective goggles and gloves when handling this chemical. Wash off immediately in case of accidental splashes of the product or spray mixture. Don't smoke, drink or eat when handling this chemical. After work, carefully clean the spraying equipment, remove the contaminated clothes, gloves and wash them before re use. Bathe at the end of spray operation and change clothes.

RE-ENTRY PERIOD: As a general rule treated areas should not be entered before spray deposit on plant surfaces has dried unless protective clothing is worn. It is safe to enter the treated areas with ACETAK 200SL after this.

SAFETY PRECAUTIONS: Keep away from food, drink and animals. While handling the material wear protective clothing (Overall or long trousers with long sleeves shirt). Avoid inhalation of the material, avoid direct contact of the liquid with eyes or skin. Wear respirator, natural rubber gloves and goggles. Wash hands, arms and face thoroughly with soap and hot water, and wash all contaminated clothing with soap and hot water before reuse. After use wash, sprayer and equipment thoroughly with water and detergent. **KEEP OUT OF REACH OF CHILDREN.**

STORAGE: Store in the original tightly closed container in a cool, dry well ventilated place under lock and key so that unauthorized persons do not have access. Keep out of reach of children. Keep away from food drink and animal feeding stuffs. Keep away from heat, sparks and open flame. Handle as a flammable liquid - No smoking.

DISPOSAL: Do not re-use, the empty container for any other purpose. Dispose empty container by burning or burying, the empty container in a safe and authorized place. Pesticides, spray mixture or residue that cannot be used **MUST** be disposed of where it cannot contaminate water or wildlife.

ENVIRONMENTAL HAZARDS: ACETAMIPRID is toxic to bees, do not spray when bees are actively foraging. Application should be timed to provide the maximum possible interval between treatment and the next period of bee activity. Direct exposure to the spray during application should be avoided. At the recommended rates Acetamiprid is nontoxic to birds but is highly toxic to fish. Direct contamination of surface water and contamination by spray drift have to be strictly avoided. Do not contaminate rivers, lakes, ponds and water used for irrigation or domestic purpose or flowing or stagnant water, by the disposal of product wastes. Do not contaminate soil, stagnant or running water by disposal of waste. Newly treated areas must not be grazed and all livestock to be kept out, no food or feed should be collected from treated areas.

FIRST AID MEASURE: If inhaled: Wash with plenty of water for at least 15 minutes and seek medical advice. Eye contact: Flush eyes immediately with plenty of water for at least 15 minutes and seek medical advice. Skin contact: Wash affected skin with soap and water. If swallowed: Do not induce vomiting.
