

AMBAR 480 SC-1L-label size:278(w)x138(h)mm

General Information:

AMBAR® 480SC is a herbicide for the control of a variety of annual weeds in potatoes and carrots.

AMBAR® 480SC is absorbed via roots and foliage and translocated acropetally in the xylem. The product may be applied both pre-and early pest emergence to weeds. When used pre- emergence adequate soil moisture is required for activation. Organic matter content and soil texture have a marked effect on the herbicidal activity and crop compatibility of AMBAR® 480SC. Slightly higher dosage rates are required on soils of high organic matter and day content.

Mixing:

Half fill the spray tank with water. Shake the product container and pour the required volume of AMBAR® 480SC into the tank. Top up with water while agitating.

Directions for use:

Crop	Dosage	Timing
Potatoes	1.0 2.0 ltr/ha using 400 litres of water per hectare or 50 100 ml /20 ltr water	Apply pre emergence or post emergence but before the crop reaches 10cm height and before weeds reach a height of 4 cm.
Carrots	1.0 2.0 ltr/ha using 400 litres of water per hectare or 50 100 ml /20 ltr water	Apply pre-emergence to weeds, one day after planting. For post emergence to weed, the height and before weeds reach a height of 4 cm

Mixing:

Add the required quantity of AMBAR® 480SC to the spray tank half-filled with clean water with the agitation system in operation and then fill with water to the required level. Continue agitation at all times during mixing, spraying and stoppages until the tank is completely empty.
